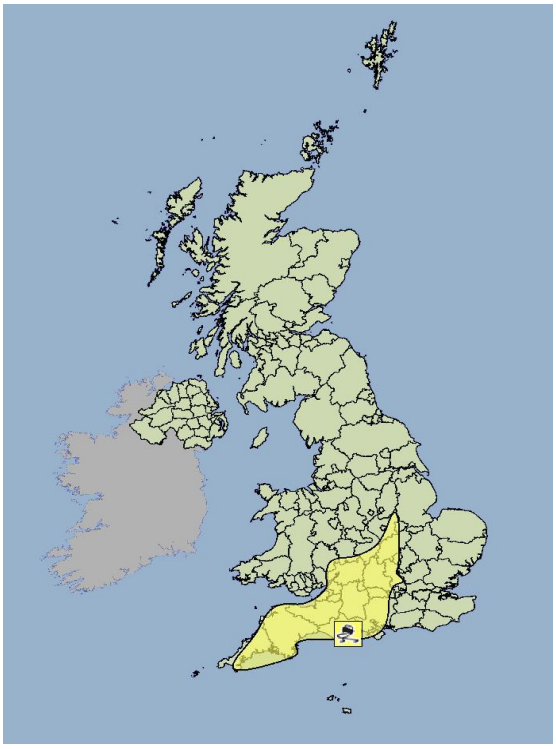
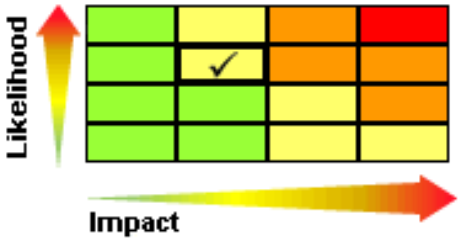
National Severe Weather Warning Service





Chief Forecasters Assessment
Rain will clear from the west during the early hours of Friday, with clearing skies allowing a rapid fall in temperature, and leading to ice forming on untreated surfaces.

A few showers of rain, sleet and hill snow will follow, possibly giving a slight covering of snow over higher ground.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **04:00 on Fri, 09th Feb 2018** until **10:00 on Fri, 09th Feb 2018**

Following a spell of rain, temperatures will fall quickly later in the night allowing ice to form on untreated pavements, cycle paths and roads. A few wintry showers will follow.

Some injuries from slips and accidents on icy surfaces are possible. Some roads and railways are likely to be affected with longer journey times by road, bus and train services.
